Information for partner organisations of mobility projects taking place in Switzerland

Switzerland is not a programme country under the Erasmus+ call 2014. In order to maintain at least some activities in the field of European mobility the Swiss government approved a budget for a transitional solution for Erasmus+ in 2014. This decision was taken with respect to the goal of the Swiss government to fully participate in Erasmus+ in 2015.

Herewith we want to inform the partner organisations of Swiss youth organisations about the most important implications of this transitional solution.

- Swiss organisations which submitted a project at the Swiss National Agency and received a positive grant decision will receive funding by the Swiss government and not by the EU. The funding will be in Swiss francs (CHF).
- The funding rules are roughly the same as under Erasmus+. Exception: The contributions to travel costs are simplified: CHF 400 (322 Euro) per participant for trips from another country to Switzerland and CHF 50 (40 Euro) for participants from Switzerland.
- Projects funded under the Swiss transitional solution 2014 are **no official Erasmus+ projects**. This means:
 - Beneficiaries are not allowed to issue Youthpass certificates to participants.
 - EVS projects in Switzerland don't have access to the EVS insurance plan and must organise an alternative insurance.
 - It is not possible to use the Erasmus+ brand (including Erasmus+ logo and name) in relation with the project.
 - For the mandatory dissemination of project results, projects may not publish the project's results on the Erasmus+ dissemination platform.

We are aware that that the transitional solution can never replace a full participation in Erasmus+. However, we hope to enable Swiss youth organisations and their partners from all over Europe to successfully implement their projects.
