

Applies for projects: 2026 or later

Green Travel Declaration

Project number	
Sending organisation	
Mobility period (in host org.)	
Number of travel days used	

The mobility participant hereby confirms that sustainable means of transport was used for travel.

Sustainable means of transport (green travel) is defined in the Programme Guide as the travel that uses low-emissions means of transport for at least half of the round trip, such as bus, train, or car-pooling. Boat travel is considered sustainable if combined with other low-emissions means of transport, or if used to travel solely between Tallinn and Helsinki or Stockholm.

The sustainable means of transport used for at least half of the round trip¹ was:

- bus
- train
- car-pooling
- boat: combined with other low-emissions means of transport or used for travel solely between Tallinn and Helsinki/Stockholm
- bicycle
- other low-emissions means of transport, please specify:

/The sending/beneficiary organisation may ask for travel tickets for checking and storing./
